- 3 Channel available

Bind Transmitter to Receiver

1. Push and Hold the Bind switch, then power on the receiver and wait until the receiver LED begins flashing.
2. Power on the transmitter.
3. Select the Model Memory you wish to bind to.
4. Select Bind from the List menu.
5. Scroll to Bind and press the Rolling Selector.
The orange LED flashes on top of the transmitter.
6. When the bind process is complete, the transmitter and receiver LEDs stop flashing and turn solid orange.

Highly recommend use Heat Shrink to protect the receiver board.
